TILE & STONE INSTALLATION PRODUCTS

DEMAND THE BEST IN TILE & STONE INSTALLATION PRODUCTS

BUYER'S GUIDE

THE COMPLETE LINE OF SIENA PRODUCTS

TO OUR VALUED CUSTOMERS

Siena Tile and Stone Installation Products prides itself on being a leader in the commercial and residential construction markets. Siena features a full line of thin and medium set specialty mortars, waterproofing and anti-fracture membranes, self-leveling, deck mud and wall float, masonry mortars, grouts, caulking, sealers and admixtures. Our state of the art manufacturing facilities, unsurpassed quality control, and our commitment to customer service has made us the professional's choice for over 40 years.

Siena is committed to our customers' satisfaction, offering the best in both products and service. We are proud of our role as a leader in the development of new and innovative products for the tile and stone installation industry. Our comprehensive product line makes Siena a complete, seamless solution for your tile and stone installation projects. Our broad range of 36 standard grout colors, plus custom color matching, gives your customers the choices they need to insure a perfect color match.

A division of Omega Products International, Siena's high quality line of products are backed by the most complete line of exterior stucco wall systems and decorative finishes in the construction market today.

This Buyer's Guide is intended to give you the product data you need to ensure you are delivering the right products to your customers at competitive industry prices. Please visit our website for additional product information, SDS, photo gallery, technical data, material calculator, and be sure you are listed on our distributor locator at SienaProducts.com.

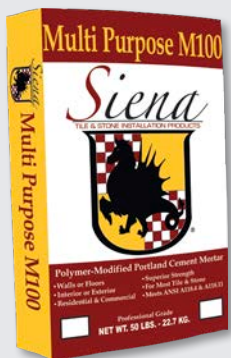

LIMITED 10 YEAR WARRANTY

Siena Tile & Stone Installation Products [Siena], a division of Omega Products International. [Omega] warrants that the products listed below are free from manufacturing defects under normal usage and conditions for a period of ten (10) years from the date of purchase when installed in accordance with product specifications, current TCNA (Tile Council of North America) guidelines and practices on properly prepared substrates. It is the responsibility of the owner and/or contractor to obtain and understand Omega and Siena's literature, specifications and appropriate published reports such as, but not limited to the current TCNA handbook, product data sheets, technical bulletins, etc. In order for this warranty to apply, the installation must be performed with one or more of the products listed below, and based on the appropriate product(s) being installed on a properly prepared substrate. Omega is not responsible for workmanship that is not in accordance with the product specifications, product data sheet instructions, TCNA guidelines and practices, and/or improperly prepared substrates. Structural movement, cracking, excessive deflection, lippage, warping, curling or defective tiles, improperly placed or lack of proper movement or control joints, flooding and/or water damage, acts of God or any failures to the substrate are not covered under this warranty. Shading and Efflorescence are inherent in all cement based products and are not considered a manufactures defect. Omega will not be responsible for failures when the use of non-specified products, competitor, or any product is used to alter the original formulation of the products that is not in accordance with specifications on the product's data sheet, and such uses and/or alterations will void this and all Omega and Siena warranties. This warranty is not transferable beyond the original owner

POLYMER-MODIFIED THIN SET MORTARS

SIENA MULTI PURPOSE M100

An economic polymer-modified mortar manufactured with portland cement to produce a high quality mortar with good bond strength, open time and coverage. Siena Multi Purpose M100 is used in a wide variety of installs over cured cement and concrete slabs, masonry, brick, backer board, and properly prepared ceramic tile. Used in interior and exterior applications of most tiles and stones, and can be used on floors, walls and in mortar beds up to 3/16" for residential and light commercial projects. Available in white and grey, and complies with the requirements of ANSI A118.4 and A118.11.

Coverage

Notch Trowel - Coverage May Vary.

1/4" x 1/4" x 1/4" (6 x 6 x 6 mm) - 95 ft² (8.8 m²)

1/4" x 3/8" x 1/4" (6 x 9.5 x 6 mm) - 75 ft² (7.0 m²)

1/2" x 1/2" x 1/2" (13 x 13 x 13 mm) - 55 ft² (5.1 m²)

Packaging

SIENA MULTI PLUS PRO M200

A premium multi-purpose polymer-modified mortar manufactured with portland cement to produce a high quality mortar with exceptional bond strength, great open time and coverage, and is used to install porcelain and other types of high dense, non porous tiles and stones. Siena Multi Plus Pro M200 is used in a wide variety of installs over cured cement and concrete slabs, masonry, brick, backer board, properly prepared ceramic tile. Siena Multi Plus Pro M200 is used in interior and exterior applications of most tiles and stones, and can be used on floors, walls and in mortar beds up to 3/16" for residential and commercial projects, and can be used over Exterior Grade Plywood (EGP). Siena Multi Plus Pro M200 is available in white and grey, and complies with the requirements of ANSI A118.4 and A118.11.

SIENA PRO SET FLEX M300

A premium flexible polymer-modified mortar manufactured with portland cement to produce a high quality mortar with exceptional bond strength, higher flexibility, greater open time and coverage, and is used to install porcelain and other types of high dense, non porous tiles and stones. Used as a flexible mortar for interior and exterior applications of most tiles and stones. Can be used on floors, walls and in mortar beds up to 3/16" in residential and commercial projects. Siena Pro Set Flex M300 will span cracks up to 1/16" (1.6 mm) in substrates with limited vibration and deflection, and can be used over exterior grade plywood (EGP). Available in white or grey, and complies with the requirements of ANSI A118.15

SIENA GLASS TILE PRO M375

A high performance, premium flexible polymer-modified mortar designed to give superior bond strength to the most demanding tile and stone installations. Siena Glass Tile Pro M375 is manufactured with portland cement and proprietary additives to produce a flexible, high quality tile and stone adhesive, with non-sagging and mildew resistant properties. Siena Glass Tile Pro M375 has exceptional strength, adhesion, open time and coverage beyond other premium mortars. Siena Glass Tile Pro M375 is used in interior and exterior application of most tiles, stones, decorative glass or metal tiles, pavers, brick, thin brick, and stone veneers. Siena Glass Tile Pro M375 can be used on floors, walls and in mortar beds up to 3/16" in residential and commercial projects. It is available in gray, and in a consistent white color for translucent tiles, and will span cracks up to 1/8". Siena Glass Tile Pro M375 exceeds the requirements of ANSI A118.15

**SIENA LFT, LHT M225**

A polymer-modified medium bed mortar manufactured with portland cement to produce a high quality mortar with increased bond strength, easy adjustability, reduced lippage, greater open time and coverage than standard medium bed mortars. Siena LFT, LHT M225 is specially formulated for the installation of most large format and un-gauged tiles and stones without the need of leveling the receiving substrate. Siena LFT, LHT M225 can be used for interior and exterior application and on floors in residential and commercial projects. Siena LFT, LHT M225 can be use as a setting bed 3/16" up to 3/4" thick. For large format and un-gauged tiles and stone in vertical installs, use Siena LFT, LHT Pro M400 which contains non-slip/ non-sag chemicals to help eliminate sliding. Siena LFT, LHT M225 is available in white or gray, and complies with the requirements of ANSI A118.4 and A118.11.

**SIENA CRETE ADMIX AX400 & SIENA CRETE POWDER**

A premium admixture designed to be used with Siena Crete Powder or a site mixture of sand and cement to create a premium polymer-modified mortar, which offers higher bond strength, greater flexibility, resistance to frost, longer open time and better coverage than standard mortars. Siena Crete Admix AX400 is used in demanding applications of tile, stone, brick, and thin brick installs, high moisture environments, and heavy traffic areas. The increased flexibility allows for substrate adjustments from climate and temperature changes without shearing. Siena Crete Admix AX400 can be used on floors, walls and in mortar beds as thin as 3/32" in interior and exterior, residential and commercial projects. Siena Crete Powder is available in white or grey, and complies with the requirements of ANSI A118.15 (when mixed with Siena Crete Powder) certified by H.C. Muddox Interstate Brick.

**SIENA ELASTO PRO EP200**

An exceptional elastomeric modified mortar and anti-fracture membrane manufactured with acrylic polymers and portland cement to produce a high quality flexible mortar with unmatched strength and flexibility. Siena Elasto Pro EP200 is specially formulated for the installation of most tiles and stones over substrates susceptible to deflections up to 1/240 of span. As an anti-fracture membrane, it can isolate preexisting and stress cracks, and prevent them from transferring through to the finished goods. Siena Elasto Pro EP200 can be used in interior and exterior applications, on floors or walls in residential and commercial projects. Siena Elasto Pro EP200 is available in white or grey, and is a two part product (Elasto Mix AX200 & Elasto Pro EP200 Powder). Exceeds ANSI A108.5, ANSI A118.12.

MEMBRANES • SURFACE PREP

SIENA DRAGON SKIN

WATERPROOF & ANTI-FRACTURE MEMBRANE

A premium ready to use, and IAPMO certified water-proofing and anti-fracture membrane, manufactured with latex polymers to produce a high quality elastomeric, and fast drying barrier. It's easily applied using a trowel, roller, paint brush or sprayer, and is available in both purple and white colors. Dragon Skin is used on recommended substrates as a barrier to water migration for load bearing tile and stone installations, and as an anti-fracture membrane used to prevent shrinkage or non-structural cracks up to 1/8" transmitting from the substrate through to the finished goods. Use polymer modified mortars meeting ANSI A118.4 or A118.11 for tile or stone installations over the Siena Dragon Skin membrane. Dragon Skin bonds to most surfaces, dries quickly (less than two hours), low VOC - has almost no odor, is not sticky or messy, and is ready to flood test in as little as 24 hours. Exceeds the requirements for ANSI A118.10 for waterproofing membranes, and ANSI A118.12 for anti-fracture membranes. It can be used in residential, commercial, interior and exterior tile and stone installations. IAPMO has listed Siena Dragon Skin for use as a shower pan liner (IAPMO R&T File # 6892).

Coverage — Coverage May Vary.

(1 coat) 30 mil wet thickness: 100 ft² (9.3 m²) per gal.
(2 coat) 60 mil wet thickness: 50 ft² (4.6 m²) per gal.

SIENA FRACTURE SHIELD

WATER RESISTANT & ANTI-FRACTURE MEMBRANE

A ready to use anti-fracture, crack isolation and water resistant membrane, manufactured with latex polymers to produce a high quality elastomeric barrier that protects tile and stone floors from cracks due to minor surface movement. Siena Fracture Shield is used on recommended substrates to prevent shrinkage or non-structural cracks up to 1/8" from transmitting from the substrate through the finished goods. Use polymer modified mortars meeting ANSI A118.4 or A118.11 for tile or stone installations over the Siena Fracture Shield membrane. Fracture Shield is easily applied with a trowel, roller or brush. Fracture Shield can be used in residential, commercial, interior and exterior tile and stone applications, and exceeds the crack isolation requirements of ANSI A118.12

SIENA DECK MUD

A deck mud that is used to create a high strength cementitious substrate and setting bed for horizontal applications of most tile or stone installations. Designed for most interior and exterior, commercial and residential applications such as floors, shower pans, countertops, depressed slabs, and plywood substrates where a waterproof membrane is used. Siena Deck Mud is a factory blended mortar consisting of portland cement which complies with ASTM C150 and graded sand which complies with ASTM C144.

SIENA WALL FLOAT

A wall float designed to be used as a scratch and brown coat over open framing with metal lath to create a solid vertical substrate used for most tile and stone installations. Siena Wall Float may be used for interior and exterior, residential and commercial applications on walls and ceilings. When Siena Admix AX300 or AX400 are used in lieu of water with the Siena Wall Float, flexibility, adhesion, and water resistance are improved. Siena Wall Float is available in grey and is a mortar that consists of portland cement complying with ASTM C150, hydrated lime complying with ASTM C207, and sand complying with ASTM C144.

SIENA PRESTO PAK

Siena Presto is a powder accelerating admixture made to use with cement-based products. Presto is a non-corrosive, non-chloride additive designed to accelerate setting times of both modified and non-modified portland cement-based products, such as tile mortars, stone veneer mortars and grouts. Siena Presto is designed to significantly reduce project timeline by accelerating setting times of portland cement-based tile mortars, stone veneer mortars and grouts. Add the desired quantity of Presto (one or two bags) to the amount of water specified in the instructions for the mortar or grout needing acceleration. Add the dry mortar or grout to the water and Presto solution according to mixing instructions for the mortar or grout product being used.

SIENA ADMIX AX300 ADMIXTURE

A premium acrylic admixture manufactured with high quality polymers to produce a high strength admixture for Siena dry-set mortars and masonry mortars. Siena Admix AX300 promotes increased flexibility, adhesion, surface appearance, and bond strength when used with Siena mortars. Siena Admix AX300 can be used to enhance the performance, density, flexibility and adhesion of non-modified mortars, such as Siena ThinSet 510, Premium Set 550, Siena Type S and Siena Stone Veneer Mortar (SVM). Siena Admix AX300 complies with ANSI A118.4 and A118.6. Use with non-modified grouts or mortars only.

SIENA EPOXY GROUT & MORTAR

A 100% solid epoxy that can be used as a grout or a mortar. Siena Epoxy Grout & Mortar can be used for setting and grouting tiles and stones, glass and metals, pavers, marbles and more over a variety of substrates. Siena Epoxy Grout & Mortar produces a high strength mortar and grout that is impermeable, stain and shock resistant. It has exceptionally high chemical resistance to many acids, alkalis, solvents and stains, making it ideal for usage in areas such as commercial kitchens, hospitals, countertops, floors and walls, interior and exterior, residential and commercial applications, and any area where the use of strong chemicals cause erosion and damage to traditional cementitious mortars beds and grout joints. Siena Epoxy Grout & Mortar conforms to the requirements for chemical-resistant, water cleanable, tile setting and grouting epoxy found in ANSI A118.3 and ANSI A108.6.

LIMITED WARRANTY

Siena Tile & Stone Installation Products [Siena], a division of Omega Products International [Omega], warrants that the products listed herein are free from manufacturing defects under normal usage and conditions for a period specified by the named system, from the date of purchase when installed in accordance with product specifications, the current TCNA (Tile Council of North America) guidelines, and approved installation practices on properly prepared substrates. It is the responsibility of the owner and/or contractor to obtain and understand Omega and Siena's current literature, specifications and appropriate published reports such as, but not limited to: the current TCNA handbook, current product data sheets, technical bulletins, etc. In order for this warranty to apply, the installation must be performed with one or more of the products listed herein, and based on the appropriate product(s) being installed on a properly prepared substrate. Omega is not responsible for workmanship that is not in accordance with the product specifications, product data sheet instructions, TCNA guidelines, and/or improperly prepared substrates. Structural movement, cracking, excessive deflection, lippage, warping, curling or defective tiles, improperly placed or lack of proper movement or control joints, flooding and/or water damage, acts of God, or any failures to the substrate, are not covered under this warranty. Shading and Efflorescence are inherent in all cement-based products and are not considered a manufacturer's defect. Omega will not be responsible for failures when the use of non-specified products, competitor, or any items or product is used to alter the original formulation of the Siena or Omega products that are not in accordance with specifications on the product's data sheet, and such uses and/or alterations will void this and all Omega and Siena warranties. This warranty is not transferable beyond the original owner.

REMEDY and EXCLUSIONS

It is expressly understood and agreed that the buyer's sole and exclusive remedy shall be that Omega will repair or replace, at their discretion, the affected area of the system. The cost to Omega shall not exceed the original square foot cost of the installation proven to be defective. Omega is not responsible for dye lots or shades of the finish materials. Under no circumstance shall Omega be liable for incidental or consequential damages. Omega makes no warranty of merchantability or fitness for a particular purpose with respect to the product sold herein. Handling and use of the products are beyond the control of Omega, therefore no warranty is made, expressed or implied, as to the results obtained from the use of the product. It is the responsibility of the buyer/installer to determine the suitability of the material for the intended use and purpose, and the buyer/installer assumes all risk regarding such suitability. This warranty takes the place of all other warranties, and there are no verbal agreements or other warranties, expressed or implied other than the warranty stated herein. This understanding shall not be modified except in writing by an officer of Omega Products International.

CLAIMS

Owner/Installer shall notify Omega immediately in writing within thirty (30) days of any alleged manufacturing defect in the material covered by this warranty. Owner/Installer will be required to provide proof of product purchase and use, and will provide Omega with reasonable time and opportunity to review and investigate the alleged manufacturing defect. For any claim presented under the warranty, Omega will provide the owner with a remedy as described above. For any claim that is not valid, Owner will pay Omega reasonable charges, including travel and labor associated with investigation of such claim. Address your claim to: Omega Products International, 1681 California Avenue, Corona, CA 92881
